Technical Skills

Operating Systems: Windows 10/11, macOS, Ubuntu/Kali (VMs)

Authentication: MFA (Microsoft Authenticator, SMS/voice), Soft/Hard Tokens, YubiKey, Password-less Login

Directory Services: Active Directory, OU navigation, Group Policy, User/Group Management

Devices: Dell/HP laptops, Lenovo desktops, printers, docking stations, monitors, iOS/Android mobile devices

Ticketing Systems: ServiceNow, Jira, OKTA,

Networking: VPN support, network drive mapping (UNC paths), basic TCP/IP troubleshooting

Tools: Microsoft Intune, PowerShell, Command Line, Outlook & Office Suite, Microsoft Intune, Citrix, VMware,

Azure Virtual Desktop, SCCM (Imaging & Deployment), Splunk, Postman, Agile

Soft Skills: Customer service, clear communication, problem-solving, multitasking, patience, Professionalism under pressure.

Experience

Desktop Support Technician / End-User Support (Contract)

Ensono/Illumin (IT Associates) - Woodbury, MN | Oct 2025 – Present

- Provide hands-on and remote end-user support for a large-scale Windows 10 → Windows 11 enterprise Upgrade readiness
- Image and deploy Windows 11 devices using SCCM and Intune, ensuring successful upgrades and user
- Assist users with device setup, migration, and post-upgrade troubleshooting, minimizing downtime
- Perform pre-upgrade readiness checks including hardware compatibility, backups, and OS validation
- Troubleshoot desktop/laptop OS issues, peripherals, printers, and mobile devices
- Act as first point of contact for end-user incidents, driving First Call Resolution and meeting ticket SLAs
- Support network connectivity issues from switch port to end-user desk (wired & wireless)
- Manage asset lifecycle tasks including device boxing, shipping, and inventory tracking
- Test and validate desktop images and software packages prior to deployment
- Support VDI environments including Citrix, VMware, and Azure Virtual Desktop
- Maintain endpoint security using antivirus and endpoint protection tools
- Deliver clear technical guidance and occasional user training on hardware and software usage

Help Desk Technician Contract

Lorien · Minnesota, United States · Remote | Apr 2025 - Nov 2025

- Promote a high level of customer satisfaction through proper telephone techniques, and respond with the appropriate amount of urgency to user problems
- Assist in tracking help desk calls pertaining to application, networking, and systems problems and issues
- Provide support for Windows 10 and some legacy Windows 7 by evaluating and troubleshooting issues including running in-depth diagnostics
- Assign username, password and access right permissions for multiple proprietary applications, as well as client software
- Document, track and monitor problems to ensure timely resolution
- Identify, research and resolves technical problems
- Correct application issues, solve network and security problems and identify common PC software and hardware problems
- Provide hardware support of PCs and Laptops, such as installing replacement hardware or upgrading hardware
- Support Software/Hardware on equipment such as, Scanners, Copiers, Printers, Monitors and other peripherals
- Perform other duties as assigned by management

IT Helpdesk Analyst / Software Support Engineer

Robert Half — Northfield, MN | Apr 2024 – Present

- Provide Tier 1–2 support for 150+ corporate end users across Windows 10/11, Microsoft 365, Outlook, Teams, and company-issued hardware (Dell/HP laptops, Lenovo desktops, monitors, docks, peripherals).
- Support MFA authentication issues, including Microsoft Authenticator, SMS/voice verification, hard/soft token resets, and troubleshooting password-less login flows.
- Assist with biometric login technologies, including YubiKey support, PIN resets, device enrollment, and credential Lifecycle management.
- Perform Active Directory administration: password resets, unlocking accounts, security group updates, workstation joins, profile fixes, and OU navigation.
- Resolve network drive mapping issues, assist with UNC path navigation, restore lost mappings, and troubleshoot VPN-based connectivity to shared resources.
- Manage tickets through ServiceNow, documenting resolutions and maintaining SLA compliance in a high-volume support Queue.
- Troubleshoot hardware issues (laptops, printers, monitors), software installations, Outlook profile corruption, and Windows update failures.
- Support mobile device setup and troubleshooting for iOS and Android, including email configuration and MDM enrollment via Intune.
- Diagnose VPN, Wi-Fi, and LAN connectivity problems, escalating Layer 3/4 network issues when needed.
- Built Python automation scripts that improved ticket resolution speed by 30% and reduced repetitive troubleshooting.

IT Helpdesk / Web Developer

KGP Co. — Faribault, MN | Jun 2023 – Jan 2024

- Imaged, configured, and deployed 150+ Windows 10/11 workstations, including BIOS updates, driver installation, BitLocker recovery, and domain join.
- Supported corporate authentication systems, including MFA resets, token enrollment, workstation, Credential troubleshooting, and identity verification.

- Provided day-to-day Active Directory support, including user onboarding/offboarding, mailbox provisioning, group membership management, and account auditing.
- Resolved network drive errors, re-mapped shared drives, updated permissions, and troubleshoot VPN-related mapping failures.
- Delivered hardware support for laptops, printers, scanners, and peripherals; performed component swaps, cable management, and docking station configuration.
- Utilized OKTA to manage tickets, track incidents, and communicate with stakeholders.
- Supported Outlook and Office Suite issues, including PST corruption, mailbox sync errors, add-in failures, and Teams meeting integration.
- Created automation scripts used by the helpdesk team to streamline recurring troubleshooting tasks and reduce issue repetition.
- Collaborated with the infrastructure team on network connectivity issues and device onboarding.

Software Engineer Intern / IT Support

Accenture — Richfield, MN | Jun 2022 – Mar 2023

- Assisted employees with Windows 10/11 troubleshooting, profile corruption fixes, software installs, VPN issues, and network drive access problems.
- Supported account provisioning and Active Directory tasks, including group membership checks, authentication troubleshooting, and account permissions.
- Provided frontline triage in a high-volume support queue, escalating advanced cases to network and cloud support teams.
- Helped troubleshoot password resets, MFA authentication failures, and device enrollment workflows.
- Worked with cross-functional teams to support end-users and ensure minimal downtime during application deployments.

Projects

Virtual Machine Deployment & Linux Administration

- Created and configured VMs using Ubuntu and Kali Linux for enterprise-level training and security labs.
- Managed network adapters, NAT/Bridged connections, user accounts, permissions, and UFW firewall settings.
- Performed Linux administration tasks using Bash and PowerShell for troubleshooting and automation.

Education

Minneapolis Community & Technical College **A.A.S. Computer Software Development / Cyber Security and Defense (Expected May 2026)**

Coursework: Visual C# .NET Programming, Web Client & Server Programming, Software Development Lifecycle (SDLC), SQL Server Database Design, Systems Analysis & Design, Python Programming, Object-Oriented Programming, Database Management Systems. Microsoft Windows Operating Systems, Linux System Administration, Microsoft Server System Administration, Computer Networks, Internet & Network Security, Ethical Hacking and Network Defense

Full-Stack Software Engineering Certificate **Prime Digital Academy (Nov 2024 – Jun 2025)**

Coursework: JavaScript (ES6+), React.js, Node.js, Express.js, RESTful API Development, PostgreSQL Database Design, Git & GitHub Version Control, Agile/Scrum Development Practices, Test-Driven Development (TDD), Full-Stack Application Architecture, Debugging & Code Reviews.
